ABSTRACTED-PUB-NO: JP2002173622A

BASIC-ABSTRACT:

NOVELTY - An ink composition activated by ultraviolet rays contains specified europium complex (I).

DETAILED DESCRIPTION - An ink composition activated by ultraviolet rays contains europium complex of formula (I).

A = optically substituted 2-naphthyl selected from alkyl, alkoxy and halogen;
and

R = 1-3C fluorine-contained alkyl or methyl.

INDEPENDENT CLAIMS are also included for:

- (1) ink compositions containing compounds of formula (II);
- (2) ink compositions containing compounds of formula (III); and
- (3) ink compositions containing compounds of formula (IV).

A, R = same as in formula (I); and

R1, R2, R3 and R4 = H, alkyl or aryl.

USE - Used for prints with security functions such as office documents, markings for various kinds of cases or bar codes.

ADVANTAGE - The composition is substantially invisible under visible light but shows sufficient radiating strength under ultraviolet rays.
